Subject Response to ballot wording and calculations.

You are correct that the FHD tax ballot wording was not correct. It appears that the calculation to identify the gap between the proposed tax rate was found by comparing it to last year's approved rate of $0.134323, rather than the current year's approved rate of $0.130152. This made the increase ***$0.115677*** *instead of the correct amount of* ***$.119848.***

We contacted the Secretary of State and sought their guidance. They shared the procedure required to correct a ballot during an election. Our County Election Administrators are currently addressing the guidelines recommended by SOS.

Respectfully,

Tony Price
